

Master of

HEALTH INFORMATICS

Become a Leader in the Growing Field of Health Informatics

In today's electronic and data-driven health care industry, the demand for experts in health informatics continues to increase. Purdue Global's online master's degree intersects health care, computer science, and information management. The program is aimed at preparing you to analyze and apply innovative technology with a focus on maintaining, improving, and advancing health outcomes for patients through the use of information systems, software, and databases. Our master's degree program is ideal for experienced health care professionals who are looking to advance their careers or for qualified IT workers who wish to transition into the health care industry.

Why Study at Purdue Global's School of Health Sciences?

Online Flexibility for Working Adults

Earn your degree 100% online, while meeting the demands of your career.

Faculty Expertise

Learn from experienced professionals currently active in the field. Nearly all faculty possess advanced academic degrees.

Relevant, Rigorous Curriculum

Explore leadership in health care, health informatics, health care data analysis, statistics, project management, and health information systems.

Hands-On Experience

Apply your learning to a real-world issue in health informatics through a final capstone project.

One-on-One Mentoring

Work directly with faculty during online discussion boards and faculty office hours, and enjoy no-cost individual tutoring. In addition, academic and career advisors are dedicated to helping you balance school with your career and life responsibilities.

NATIONALLY RANKED AND RESPECTED

Purdue Global is part of the respected Purdue University system. One of the most prestigious research universities in the world, Purdue University is ranked in the top 10 best public universities in the U.S. by *The Wall Street Journal/Times Higher Education*.¹

Earn a Valuable Credential to Advance Your Career

Prepare for Health Informatics Leadership Roles

Our master's degree can help you position yourself at the forefront of efforts to improve the nation's health care system. The program serves as a specialized career pathway to build on your existing skills and expertise to help you qualify for management positions in health informatics.²

Drive Data Improvements in Clinical, Financial, and Public Health

Learn to use information technology and information management concepts to improve the efficiency and quality of health care services.

PROGRAM OUTCOMES

- Evaluate technology integration into the health care environment.
- Defend the impact of professional standards on health informatics.
- Interpret health care data through the application of technological tools.
- Design health informatics solutions with socio-technological considerations.

HIMSS-APPROVED EDUCATION PARTNER

HIMSS-approved educational programs, which include the Master of Health Informatics, provide advanced knowledge in health information and technology or health care and prepare candidates to sit for the CAHIMS or CPHIMS exam.

HIMSS ACADEMIC ORGANIZATIONAL AFFILIATE

As an Academic Organization Affiliate of HIMSS, Purdue Global can provide students and faculty with resources to address global health and wellness through information and technology.

Curriculum

The comprehensive interdisciplinary curriculum focuses on the relationship between information technology, people, health, and health care systems. Courses are reviewed and updated regularly by industry experts to ensure they reflect the most recent developments in the field.

PROGRAM REQUIREMENTS	CREDITS
Leadership and Management in Health Care	4
Health Informatics	4
Health Information Applications and Systems	4
Database Design and SQL	4
Clinical Terminologies, Vocabularies, and Information Standards	4
Project Management of Health Information Systems	4
Health Care Data Analytics	4
Legal and Ethical Issues in Health Information	4
Information Systems Design and Implementation	4
Master's Capstone in Health Informatics	4
Total Core Requirements	40
OPEN ELECTIVE REQUIREMENTS	CREDITS
Health Informatics Elective	8
Total Open Elective Requirements	8
TOTAL CREDITS	48

Capstone Project

The Master of Health Informatics program culminates in the successful completion of a practice-focused capstone project. This project provides you with opportunities to apply what you've learned to a challenging, real-world problem or issue in health informatics. You will conduct the capstone project under the mentorship of a faculty advisor.

Program Detail

Program Length: Less than 18 months of full-time study

Course Load: 2 courses per term

Terms: 10 weeks long

Start Dates: Throughout the year

Delivery: 100% online

Through your elective course selection, you may qualify to earn the digital health leader micro-credential and the CAHIIM Digital Health Leader Certificate. The Digital Health Leader Certificate Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

After I obtained my MHI, my employer presented opportunities for growth in the future that I may not have otherwise met the qualifications for. Being able to grow with a company that I enjoy working for is very important to me since I was not planning to leave my current organization."

Haimwattie Pariag
MHI Graduate*

The mission of the Master of Health Informatics program is to prepare graduates to assume key roles in the field of health informatics, and provide an engaging educational experience that incorporates the flexibility and accessibility offered via a fully online delivery format. Accreditation and industry-driven competencies of health, information science and technology, and social and behavioral science domains will be delivered through curricular approaches driven by evidenced-based learning practices.

Career and Networking Opportunities

Industry Outlook⁵

- Employment of medical and health service managers is projected to grow 28% from 2022 to 2032—that's much faster than average for all occupations.
- Demand for managers with knowledge of health information technology (IT) and informatics systems will be fueled by the aging of the large baby-boom population as well as widespread use of electronic health records (EHRs).
- Candidates with a master's degree in health administration or a related field, as well as knowledge of health care IT systems, will likely have the best prospects.

Career Pathways and Outcomes²

Roles

- Medical records and health information technician
- Compliance officer
- Application analyst
- Clinical analyst
- Data analytics/data mining engineer
- Health informatics advocate
- Public health information officer
- Computer and information research scientist
- Information security analyst
- Statistician

Settings/Industries

- Hospitals
- Primary care facilities
- Physicians' offices
- Insurance companies
- Pharmacies

The Center for Career Advancement

Our team of Career Specialists helps connect graduates with job and networking opportunities and offers the following assistance:

- Career assessment/exploration
- Resume and cover letter review
- Interview preparation/mock interviews
- Portfolio development to showcase your skills
- Assistance in building an online presence
- Job search and networking support
- Virtual career fairs
- 24/7 online access to job openings and career development tools

As health care systems increasingly rely on technology and data-driven approaches, professionals in health informatics contribute to advancements in health care delivery, patient safety, clinical decision-making, and public health initiatives. The MHI program prepares you to navigate the complex intersection of health care, technology, and data."

Zeynep Behjet MD, MHI, MEd, Program Chair⁴

Accredited by the Higher Learning Commission

The HLC (HLCCommission.org) is an institutional accreditation agency recognized by the U.S. Department of Education.

Military Friendly

We offer reduced tuition rates for servicemembers, veterans, and spouses.
