MASTER OF SCIENCE IN INFORMATION TECHNOLOGY

BUILD THE SPECIALIZED IT EXPERTISE TO ADVANCE YOUR CAREER

Businesses and organizations of all kinds require IT leaders whose expertise goes far beyond foundational skills in information technology. The online Master of Science in Information Technology at Purdue University Global is designed to help working professionals make the connection between IT, communications, and business so you can develop marketable technical, creative, and managerial skills to help advance your career.
WHY STUDY TECHNOLOGY AT PURDUE GLOBAL?

EXCELTREACK™ ONLINE DEGREE OPTION
Complete your degree faster and more affordably with our ExcelTrack™ master’s in information technology program.¹

ONLINE FLEXIBILITY FOR WORKING ADULTS
Earn your degree 100% online, while meeting the demands of your career. You can also visit one of our regional locations to take advantage of local, onsite support and services.

HANDS-ON LEARNING
Gain tangible experience through learning labs that simulate real-world, on-the-job situations. This also helps you build a portfolio of diverse learning skills.

FACULTY EXPERTISE
Learn from practicing professionals with extensive experience in IT and higher education. All faculty members possess advanced academic degrees and many hold industry certifications, have significant industry experience, contribute to academic journals, and present at conferences.

ONE-ON-ONE MENTORING
Work directly with faculty during online discussion boards and faculty office hours, and enjoy no-cost individual tutoring. In addition, academic and career advisors are dedicated to helping you balance school with your work, family, and community responsibilities.

NATIONALLY RANKED AND RESPECTED
Purdue Global is part of the respected Purdue University system. One of the most prestigious research universities in the world, Purdue University is ranked in the top 10 best public universities in the U.S. by The Wall Street Journal/Times Higher Education.¹

Graduates may use their expertise to pursue a career as a consultant, start a technology services business, or apply for leadership positions where they can manage complex technology demands.²

CONCENTRATION AREAS
Customize your degree plan to develop specialized expertise in your chosen career path. We offer several concentrations aligned to current industry demands.

Business Intelligence
Study the analysis and development of decision support systems, business intelligence, knowledge acquisition and representation models, data mining concepts, algorithms, and applications.

Cybersecurity
Explore fundamentals such as viruses, worms, and other malicious software, as well as more high-level aspects of IT security such as network defense, ethical hacking, and computer forensics.

Project Management
Focus on every phase of the project life cycle using current software to achieve goals and objectives. Learn to control project cost and scheduling, analyze project risk and quality, and consider legal and ethical issues.

Amazon Web Services (AWS) Cloud Technologies
Explore cloud computing, architecting, and AWS core services. Examine the fundamentals of AWS infrastructure, service options, and best practices in the AWS Cloud.

Secure Software Development and Quality Assurance
Examine secure software development and design concepts. Apply best practices for coding, software testing, and implementation processes.

Data Analytics
Explore statistical methods for data analytics and employ appropriate data analytics concepts and tools. Apply foundational programming concepts in an analytics setting.

Note: The project management concentration is not available in the ExcelTrack™ program.
CURRICULUM

Our rigorous curriculum prepares you for a variety of IT leadership roles. All courses are reviewed by our dedicated curriculum department and advisory board to ensure they reflect the most recent developments in the field.
